

## **VILLAGE BOARD APPOINTS COMMITTEE TO STUDY A WIRELESS INTERNET SYSTEM ACCESSIBLE THROUGHOUT THE VILLAGE**

The Village Board recently appointed an ad-hoc committee to study the feasibility of providing municipal wireless Internet access to Village residents. The committee is comprised of interested residents with differing professional experience and insight concerning this subject. The committee held its first meeting on June 7<sup>th</sup> and has begun its investigation into various approaches to provide this service.

Over the coming months, the committee will interview different wireless Internet providers as well as investigate emerging technological advances for wireless service.

Once the committee has focused on a particular service/provider, it will seek resident input regarding the proposed service, as well as information concerning current connections to the Internet and accessibility to wireless service.

If you would like more information about the work being performed by the committee, or would like to offer any suggestions or concerns, please contact Jason Slowinski at [jslowinski@river-forest.us](mailto:jslowinski@river-forest.us) or by phone at 708.366.8500 ext. 323.
